Rachel expressed interest in SUUMs during our general, so if she could help in a small part on this that would be great. I'm all for a team approach to getting this one figured out if it makes the most sense. Once we get the EFED email I'll set up a meeting with all of us to discuss.

Ex. 5 Deliberative Process (DP)

There are only two labels and limited usage values to report. So, it seems like a good one for Rachel, in that regard. Perhaps Lindsey (and I) could tackle the usage.

I know she has a guidance to work on and finalizing the Neonic SUUM. Concerned with when she could fit everything in. Probably need to discuss this with Steve and see if we do want her to continue with aldicarb if we need to move something over to someone else. Unsure if Claire could take on something for Lindsey like the guidance. I also wonder if it's too early for that to be a training opportunity on label guidance for Rachel.

Are you intending to have Lindsey work on the aldicarb xSUUM?

Regards,
Mark
